JOURNAL OF GEOLOGICAL EDUCATION
Vol. 8, No. 1, Spring 1960, pp. 18-29.

INDEX, VOLUME 1 (1951) THROUGH VOLUME 7 (1959)

ROBERT L. BATES
Editor

Prefatory note. A look backward, to see where we have been, is often helpful in looking forward to see where we are going. I hope this index will not only be conventionally useful, but will also indicate what has so far been of enough interest to teachers of geology to warrant publication in their *Journal*. A perusal of the Subject Index reveals that the largest number of papers have been on the elementary geology course; geology in relation to other subjects; historical geology; mineralogy; and teaching aims, methods, and devices. In contrast, little attention has been given to economic geology, geomorphology, paleontology, petrology, and structural geology; or to the teaching of advanced courses. In future volumes of the *Journal*, perhaps teachers involved in this second group of subjects will prove to be as articulate in presenting their problems and methods as those of the first group have been up to the present.

Previous editors of the *Journal of Geological Education* are as follows:

Volume 1, 1951-1953: William F. Read, Lawrence College.
Volumes 2-4, 1954-1956: Anastasia Van Burkalow, Hunter College.
Volumes 5 and 6, and Volume 7 No. 1, 1957-Spring 1959: Mildred F. Marple, Ohio State University.

AUTHOR INDEX

Adams, G. F.

1. A working scale model of a salt dome, 1:4:22-28, 1 table, 1 fig.; discussion, 1:4:29-32.
2. Block diagrams from perspective grids, 5:2:10-19, 5 figs., refs.

Agnew, Allen F.

Student report writing must be improved, 7:1:29-32.

Allen, John Eliot.

1. The seminar as a senior "polishing" course in geology, 1:3:50-58.
2. The art of geology, 4:1:1-4, 1 table.

Bates, Robert L.

Memorial to Stanard G. Bergquist, 4:2:59.

Beerbower, James R.

(and Dyson, James L.). Why teach historical geology?, 7:2:71-74, refs.

Behre, Charles H., Jr.

1. The college geology teacher, 1:5:11-25.
2. Problems of the geology teacher and his association, 7:1:13-17.

Bieber, Charles L.

A semester course in invertebrate paleontology, 1:2:41-44.

AUTHOR INDEX

Adams, G. F.

1. A working scale model of a salt dome, 1:4:22-28, 1 table, 1 fig.; discussion, 1:4:29-32.
2. Block diagrams from perspective grids, 5:2:10-19, 5 figs., refs.

Agnew, Allen F.

Student report writing must be improved, 7:1:29-32.

Allen, John Eliot.

1. The seminar as a senior "polishing" course in geology, 1:3:50-58.
2. The art of geology, 4:1:1-4, 1 table.

Bates, Robert L.

Memorial to Stanard G. Bergquist, 4:2:59.

Beerbower, James R.

(and Dyson, James L.). Why teach historical geology?, 7:2:71-74, refs.

Behre, Charles H., Jr.

1. The college geology teacher, 1:5:11-25.
2. Problems of the geology teacher and his association, 7:1:13-17.

Bieber, Charles L.

A semester course in invertebrate paleontology, 1:2:41-44.

Biemesderfer, George K.

A geology course for well drillers, 1:4:33-34.

Boardman, Donald C.

Correlating the geology curriculum with the general education requirements of the college, 5:1:1-3.

Bray, Richard A.

(and Staples, Lloyd W.). A demonstration conoscope, 3:2:43-46, 1 fig., refs.

Brice, James

Geology in general education courses: an observer's report, 1:3:18-24, refs.

Bullard, Fred M.

Is there room for liberal-education courses in the geology curriculum? 4:1:13-15, ref.

Campbell, Charles D.

The problem of foreign language references in a seminar on rock magnetism, 5:1:23-28, refs.

Campbell, Ian.

Teaching and research: immiscible components or isomorphous series? 6:1:11-14.

Chaffee, Roger T.

A unit in geology at the Lancaster Country Day School in Pennsylvania, 1:4:51-53.

Charlier, Roger H.

The study of geology and mineralogy in Belgium, 5:2:30-33.

Cohee, George V.

General education in retrospect, 4:1:16-18.

Cooper, Byron N.

Research and effective teaching in the geological sciences, 6:1:15-18.

Delo, David M.

Tribute to F. M. Fryxell, recipient of Neil A. Miner Award, 1953. 1:6:10-12.

Dennen, William H.

1. Laboratory mapping, 2:2:75-76, 4 figs.
2. Illustration of periodic properties, 5:2:22-23, 4 figs.

Digman, Ralph E.

1. Geologic education in secondary schools in New York State: difficulties and suggestions, 1:5:30-34, 2 tables.
2. Space requirements for a small-college geology department, 2:2:53-56, 1 table.

Donnay, J. D. H.

The geological studies of Rolf Werner Juhle (1929-1953): in memoriam, 4:2:47-51, 1 table, ref.

Dort, Wakefield, Jr.

Elementary geology in a large state university—Penn State, 3:2:63-64.

Dryden, Lincoln

On teaching historical geology, 7:2:67-70, refs.

Dunn, James R.

(and Dwonczyk, Milton). Plastic models for use in teaching crystallography and optical mineralogy, 1:6:53-57, 3 figs.

Dwonczyk, Milton. *See* Dunn, James R.

Dyson, James L. *See* Beerbower, James R.

Eckelmann, F. Donald

Physical geology integrated with general chemistry, 6:2:3-5.

Edmund, R. W.

Binocular microscope studies in the teaching of mineralogy and petrology, 1:1:44-47.

Eveland, H. E.

A space-saving method for storing bulk specimens, 4:2:53-54, 1 fig.

Faust, George T.

A practical approach, 4:2:83-86, refs.

Ferenczi, István

The teaching of geology in Hungary, 6:1:1-4.

Fisher, D. Jerome

Mineralogy for embryonic professional geologists, 1:1:8-16, 2 tables.

Foose, Richard M.

1. Teaching elementary geology in the small liberal arts college, 3:2:61-62.
2. The humanities: an antidote for overspecialization in geologic science, 4:1:9-12, refs.

Fryxell, F. M.

The estate of teaching in geology, 1:6:13-29.

Gault, H. R.

Changing requirements in chemistry, physics, and mathematics for geology majors, 1:3:13-17, 3 tables.

Giese, Ross F., Jr. *See* Norton, Matthew F.

Gillson, Joseph L.

Teaching industrial minerals to geologists, 3:1:7-10, refs.

Goldstone, F.

The geologist in an oil company, 6:2:22-27, 2 pls.

Goldthwait, Richard P.

Training New Zealand's geologists, 7:2:61-63.

Grawe, Oliver R.

Mineralogy and crystallography in engineering curricula, 1:1:40-43.

Gutschick, Raymond C.

Obligations of the geology teacher, 1:4:7-21, refs.

Hagner, Arthur F. *See also* Henderson, Donald M.

(and Henderson, Donald M.). Problems in geologic education: the elementary course, 7:1:36-39.

Heald, Milton T.

1. A periodic table of elements for geologists, 2:1:19-23, 1 plate, refs.
2. The importance of geological mineralogy, 4:2:70-72, refs.

Henderson, Donald M. *See also* Hagner, Arthur F.

1. The sizes of atoms and the study of elementary mineralogy, 1:2:16-40, 3 figs., 6 tables, refs.; corrections, 1:3:8.
2. Crystal chemistry and mineralogy, 4:2:77-80, refs.
3. (and Hagner, Arthur F.). First Summer Institute in Geology, 1957, 5:2:20-21.

Hendriks, Herbert E.

1. The organization and operation of Camp Norton, 1:5:45-50.
2. Basic science and mathematics requirements in the geology curriculum, 5:1:6-10.

Higgins, Charles G.

1. Mnemonic devices in geology, 3:2:51-52.
2. Geology teaching at the university level, 6:1:5-6.

Holmes, Chauncey D.

1. A three-dimensional teaching aid in structural geology, 1:3:46-49, 5 figs.
2. Teacher, text, and student, 1:5:26-29.
3. Geology and man, 2:1:3-10, refs.
4. Key to a more efficient and effective elementary geology course, 4:2:37-42.

Horberg, Leland

Current trends in geology and their relations to geological education, 3:1:1-6, refs.

Hough, J. L.

The written word, 7:1:33-35.

Howell, B. F., Jr.

Preparation for graduate school—a study based on the needs of geophysicists and geochemists, 5:1:11-18, 3 tables.

Howell, J. V.

The present state of geological terminology, 7:1:18-21.

Hunt, Charles B.

About writing reports, some tips from G. K. Gilbert, 7:1:1-3.

Hurlbut, Cornelius S., Jr.

An outline of a course in elementary mineralogy, 1:1:17-26.

Hussey, Keith M.

Applied courses will limit our "product's" potential, 5:1:4-5.

Ireland, H. A.

Geology as a correspondence course, 3:1:17-24, 1 table.

Jenkins, George R.

Teaching geology to civil engineering students, 3:2:65-68, refs.

Jensen, David E.

1. Cleaning mineral specimens, 1:1:48-50.
2. Articles of interest to geology teachers which have appeared in Ward's Natural Science Bulletin, 1:3:59-60.

Kaikow, Julius

The role of the geology teacher in conservation education, 3:2:47-50.

Kingsley, Louise

Models for introducing structural geology, 2:2:77-79, 2 figs.

Ladoo, Raymond B.

Training for a career in industrial minerals, 2:2:57-65.

LaFleur, Robert G.

1. A technique of teaching field geology, 2:2:49-52.
2. Historical geology for the geology major, 7:2:64-66.

Langenheim, Ralph L., Jr.

1. Language requirements and other regulations for graduate study in geology, 5:1:19-22.
2. Recent developments in paleontology, 7:1:4-9, refs.

Longwell, Chester R.

The AGT and the AGI, 2:2:43-48.

Lowe, Kurt E.

1. In memoriam: Ralph Eriksen Digman, 1920-1953, 2:1:1-2.
2. (and Van Burkalow, Anastasia). In memoriam: Carl Leland Horberg, 3:2:68.

Lucke, John B.

1. The geology teaching crisis, 2:1:29-32, refs.
2. Don't penalize the potential geology major, 4:1:19-21, refs.

Ludlum, John C.

Philosophical and geometric perspectives as aids in the teaching of structural geology, 4:2:33-36.

Marple, Mildred Fisher

Memorial to John Lyon Rich, 4:2:59.

Martin, Wayne D.

Memorial to William H. Shideler, 7:1:17.

Mason, Brian

1. Crystallography in the general mineralogy course, 1:1:34-39.
2. The mineralogy textbook, 4:2:81-82.

Mitchell, Robert H.

A method of teaching historical geology, 1:2:10-13.

Montgomery, Arthur

1. Popular geology, 1:2:5-9; correction, 1:3:7.
2. Time for a change? 4:2:67-69, refs.

Moses, C. F.

2. The elementary course textbook dilemma, 3:2:58-60.

Whitmore, Frank C., Jr.

Geologic writing for the nongeologist, 7:1:25-28.

Wickwire, Grant T.

1. Field trips as an integral part of historical geology, 3:1:25-29, 1 fig.
2. A convenient display tray, 3:1:30-32, 1 fig.

Wilkerson, A. S.

Headaches from igneous rock classifications, 6:2:13-17, 3 tables, refs.

Willard, Bradford. *See also* Ryan, J. Donald

Geologic instruction in Pennsylvania, 1:4:44-47.

Winder, C. G.

Bioplastic crystal models, 6:2:9-12, 2 figs.

Woodford, A. O.

1. Use of hand specimens in petrology laboratory, 1:3:42-45.
2. What is geologic truth?, 4:1:5-8.

SUBJECT INDEX

Applied courses: Hussey.
Association of Geology Teachers, *see* National Association of Geology Teachers.

Belgium, geology and mineralogy in: Charlier.

Cleaning mineral specimens: Jensen, 1.
Conservation education, geologist in: Kaikow.
Correspondence course: Ireland.
Crystallography: Dunn; Grawe; Henderson, 1, 2; Mason, 1.
See also Mineralogy.

Elementary geology: Hagner; Holmes, 2, 4; Moses; Socolow.
Correspondence course: Ireland.
For civil engineers: Jenkins.
For well drillers: Biemesderfer.
In a large university: Dort.
In a small college: Foose, 1.
Open-book examination: Norris.
Textbook: Holmes, 2; Whitcomb, 2.
Engineering geology: Jenkins.

Field geology: Hendriks, 1; LaFleur, 1; Wickwire, 1.
Films, *see* Teaching aids.
First Summer Institute: Henderson, 3.
Foreign curricula.
Belgium: Charlier.
Hungary: Ferenczi.
New Zealand: Goldthwait.
Norway: Sweet.
Foreign languages: Campbell, C. D.; Langenheim, 1; Vitaliano.

General geology, *see* Elementary geology.
Geologic instruction in Pennsylvania: Chaffee; Moss; Platt, 1; Willard.
Geologic language: Weller.
Geologic philosophy: Allen, 2; Fryxell; Holmes, 3; Horberg; Hussey; Woodford, 2.
Geologist in an oil company: Goldstone.
Geology.
And other sciences: Eckelmann; Gault; Hendriks, 2; Howell, B. F., Jr.
And science teacher training: Webb.
And the humanities: Bullard; Foose, 2.
Art of: Allen, 2.
Current trends in: Horberg.
In general-education courses: Boardman; Cohee; Lucke, 2; Page; Parsons; Seltin; Thompson.
Research in: Staples.
Graduate school, preparation for: Howell, B. F., Jr.; Langenheim, 1.

Historical geology: Beerbower; Dryden; LaFleur, 2; Mitchell; Robertson, 1.
Field trips: Wickwire, 1.
Review chart: Whitcomb, 1.
History of geology, teaching the: Unklesbay.
Hungary, teaching of geology in: Ferenczi.

Industrial minerals, teaching the: Gillson; Ladoo.
Introductory geology, *see* Elementary geology.

Maps, *see* Teaching aids.
Memorials.
Stanard G. Bergquist: Bates.
Ralph Eriksen Digman: Lowe, 1.
F. M. Fryxell: Delo.
Carl Leland Horberg: Lowe, 2.
Rolfe Werner Juhle: Donnay.
Lynne Kelsey: Warthin, 2.
John Lyon Rich: Marple.
William H. Shideler: Martin.
Mineralogy: Faust; Fisher; Heald, 2; Henderson, 1; Hurlbut; Mason, 1, 2; Montgomery, 2; Roy; Spiroff; Thornton.
And crystal chemistry: Henderson, 2.
Automatic testing program in: Swinnerton.
Binocular microscope studies in: Edmund.
Cleavage, as identification aid: Riley.
In Belgium: Charlier.
In engineering curricula: Grawe.
Teaching aids in: Bray; Dunn; Travis; Winder.
Textbook in: Mason, 2.
See also Crystallography.
Models, *see* Teaching aids.
Motion pictures, *see* Teaching aids.

National Association of Geology Teachers: Behre, 2; Longwell; Robertson, 2.
New type of section meeting: Rosalsky, 2.
New Zealand, training geologists in: Goldthwait.
Nonprofessional geology: Biemesderfer; Montgomery, 1; Sharp, 1; Thiel; Whitmore.
Norway, geological education in: Sweet.

Oil company, geologist in: Goldstone.
Open-book examination: Norris.

Paleontology: Bieber; Langenheim, 2; Thomas.
Pennsylvania, geologic instruction in: Chaffee; Moss; Platt, 1; Willard.
Petrology: Edmund; Wilkerson; Woodford, 1.
Popular geology, *see* Nonprofessional geology; Pre-college geology.
Pre-college geology: Chaffee; Digman, 1; Moss; Mrose; Platt, 1, 2; Stone; Webb.
Preparation for graduate school: Howell, B. F., Jr.

Prospecting, an extension course: Peters, 1.

Report writing: Agnew; Hough; Hunt; Whitmore.
Research: Staples.
See also Teaching.

Salt dome, model of: Adams, 1; Nettleton.
Senior seminar: Allen, 1.
Slides, *see* Teaching aids.
Storage space: Digman, 2; Eveland; Read.
Structural geology: Holmes, 1; Kingsley; Ludlum.
Summer Institute: Henderson, 3.

Teaching: Behre, 1, 2; Fryxell; Gutschick; Higgins, 2; Holmes, 2; Jensen, 2; Kaikow; Lucke, 1.
And research: Campbell, I.; Cooper; Murray; Thurston.
Field geology: LaFleur, 1.
Industrial minerals: Gillson; Ladoo.
The history of geology: Unklesbay.
Teaching aids.
Compass and clinometer: Norton.
Conoscope: Bray.
Declination demonstrator: Ryan.
Demonstration of limestone solution: Schalk.
Diagrams: Adams, 2; Dennen, 2.
Display tray: Wickwire, 2.
Films and slides: Taylor; Threet, 1.
Hand specimens, in petrology: Woodford, 1.
Isogyrometer: Travis.
Maps and charts: Dennen, 1; Peters, 2, 3; Rosalsky, 1; Sharp, 2; Whitcomb, 1.
Mnemonic devices: Higgins, 1.
Models: Adams, 1; Dunn; Holmes, 1; Kingsley; Nettleton; Schaffel; Winder.
Periodic table of elements: Heald, 1.
Template for "three-point problem": Threet, 2.
Tilting blackboard: Turner.
Terminology: Howell, J. V.; Weller.
Textbook: Holmes, 2; Mason, 2; Whitcomb, 2.

Ward's Natural Science Bulletin, articles in: Jensen, 2.
Water-conservation course: Warthin, 1.
Writing, *see* Report writing.

INDEX, VOLUME 8 (1960) THROUGH VOLUME 12 (1964)

ROBERT L. BATES, The Ohio State University

This index supplements the one for Volumes 1 through 7, which appeared in the Spring 1960 issue of the *Journal*. The earlier index covered nine years, 19 issues,[1] and 820 pages; this one covers five years, 16 issues,[2] and 600 pages. Scope of the two is the same except that book and map reviews are included in the present one.

As judged by the number of papers published, two of the major topics mentioned in the prefatory note to the first index continue to engage authors' attention. These are the introductory geology course and the development of various teaching aids. A subject that was scarcely mentioned in the earlier period, but received much attention in the later one, is earth science and its many ramifications. Other topics on which several papers have recently appeared are (1) curricula, especially in peripheral subjects such as oceanography and geochemistry; (2) field work, at different levels and for various purposes; and (3) statistical geology or geometrics.

SUBJECT INDEX

Africa, Peace Corps geologists go to: Strain.
Age and thickness, graphic integration of: Rahm, 3.
Aphanitic igneous rocks, classification of: Robertson.
Approaches to geologic problems: Hagner.

Bahama Banks: Kornicker, 1.
Beginning geology, *see* Introductory geology.
Blind, teaching geology to the: Brophy.
Book reviews, *see* Reviews.

Cause and effect: Platt.
China, geological education in: Huang.
Cincinnati Arch area: Croneis, 2.
Classification of aphanitic igneous rocks: Robertson.
Classroom stream table: Brown, W. C.
College course for high-school students: Hayes.
Comparison of four field stations: Fuller.
Crystal-structure models: Bayly.
Crystallography, teaching of: Webb, 2.
Culture test for graduate students: Boyer.
Curricula, earth-science: Heller.
  foreign: Charlier; Huang.
  high-school: Hambleton, 2.
  in geochemistry: Winchester.
  in geological engineering: Parker.
  in mineralogy: Gillerman.
  in oceanography: Arnal; Chave.

Data processing: Shykind; Weber, 1, 2.
Digital computer, impact of: Weber, 2.

Earth a slave to energy: Keller, 1.
Earth science, current status of: Matthews, 2.
  en Français: Bellemin.
  impact of high-school courses in: Hambleton, 2.
  in the junior museum: Roberts.
  in New England schools: Hume.
  problem of teachers in: Moss; Stephenson; Yalkovsky.
  Summer Institute in: Dolloff.
  versus general science: Toohey.
Earth Science Curriculum Project: Heller.
Eastern Section, NAGT: Rosalsky, 2.
EDPM information retrieval: Weber, 1.
Elementary geology, *see* Introductory geology.
Engineering geology: Kiersch.

Enlarger as a copy camera: Hughes.
ESCP: Heller.
Examinations: Rahm, 1; Scotford.

Facts versus concepts in introductory geology: Norris.
Field course, training for: Mears.
  for high-school teachers: Stoever.
Field exercises for introductory geology: Sass, 1.
Field geology, for the advanced student: Proctor, 1.
  in the classroom: Borst.
Field stations, comparison of: Fuller.
Field work: Keller, 2.
Foreign curricula: Charlier; Huang.
Foreign languages: Bellemin; Carozzi, 1; Vitaliano.
Foreign literature, geologists versus: Vitaliano.
Fossil specimens, mount for: Hoare.
France, study of geology in: Charlier.
French, teaching in: Bellemin; Carozzi, 1.
Fusion method for determination of rare metals: Crawford.

General geology, *see* Introductory geology.
General science: Toohey.
Geochemical analysis: Woodford.
Geochemistry, in geology laboratory: Moore.
  preparation in: Winchester.
Geographic environment and geological leadership: Croneis, 2.
Geologic education: Charlier; Hagner; Huang, Monnett.
Geologic terminology: Wickwire.
Geological engineering curricula: Parker.
Geological leadership: Croneis, 2.
Geological perspective: Croneis, 1.
Geological Survey's training program: Andrews.
Geology, and graduate education: Hambleton, 1.
  in the junior high school: Deprey.
  major in a small college: Gates, 1.
Geometrics: Hubert.
Graduate education, geology and: Hambleton, 1.
Graduate students, culture test given to: Boyer.
Graphic integration of age and thickness: Rahm, 2.
Ground-water flow models: Blanchard; Lehr.
Ground-water reports, in introductory geology: Baldwin, 1.

Hardness, scale of: Staples.
Helical flow, models for studying: Tanner, 1.
High schools, *see* Secondary schools.
Historical geology: Whitcomb, 3.
  magnetic board for: Carozzi, 2.
Horberg Fund: Edmund.
How to repel students: Rogers, J. J. W.

Ice-extrusion apparatus: Stone.
Index, Volumes 1–7: Bates.
Industrial geological education: Walper.
Information retrieval: Fenner; Shykind; Weber, 1, 2.
Information storage: Fenner.
Introductory geology, facts versus concepts in: Norris.
  field exercises for: Sass, 1.
  final laboratory examination for: Rahm, 1.
  ground-water reports for reading in: Baldwin, 1.
  minerals for laboratory in: Higgins, 1.
  models of minerals for: Sass, 2.
  porosity experiments in: Brice.

Junior high school: Deprey; Taylor.
Junior museum: Roberts.
Labels for rocks: Rogers, A. S.
Laboratory in introductory geology: Brice; Higgins, 1; Rahm, 1.
Magnetic board for historical geology: Carozzi, 2.
Map reviews, *see* Reviews.
Mapping, geologic, photomosaic for: Mills.
Maps for teaching map interpretation: Summerson, 1.
Measuring earth's circumference: Tanner, 3.
Membership statistics, NAGT: Rosalsky, 1, 2.
Memorials:
  Olin Teter Brown: Connell.
  Hugh Richard Gault: Whitcomb, 1.
  Kenneth Edgar Grimm: Cook.
  F. Kermit Merrick: Bond.
  John Reed Moseley: Parsons.
  Marie B. Pabst: Christman.
  William C. Putnam: Ford.
  Joseph Leon Rosenholtz: LaFleur.
  Paris Buell Stockdale: Klepser.
  Vertress Lawrence VanderHoof: Webb, 3.
Mineral resources, for general student: Agron.
Mineralogy: Gillerman; Gore; Slawson; Webb, 2.
Minerals, atomic models of: Sass, 2.
  for geology laboratory: Higgins, 1.
Models, *see* Teaching aids.
Mohs, Friedrich: Staples.

NAGT, membership statistics: Rosalsky, 1, 2.
New England, earth science in: Hume.

Oceanography: Arnal; Chave.

Paleontology: Beerbower.
Parallelepiped, petrographic: Grew.
Peace Corps geologists: Strain.
Permeability experiments: Brice.
Petrographic parallelepiped: Grew.
Photomosaic for geologic mapping: Mills.
Physical geology, for high-school teachers: Campbell, C. D., 1.
  laboratory, geochemistry in: Moore.
  laboratory, minerals for: Higgins, 1.
  videotape lectures in: Muehlberger, 2.
Plastic mounts for fossil specimens: Hoare.
Polar rise of sea level: Eardley.
Porosity experiments: Brice.

Quantify what? Woodford.
Quantitative geology: Hubert; Kauffman.

Rare metals, determination of: Crawford.

Space relations test: Muehlberger, 1.
Statistical geology: Hubert; Kauffman; Woodford.
Status of geological education: Matthews, 2; Monnett.
Stratigraphy: Wells, 2.
Stream flow, models for studying: Tanner, 1.
Stream table: Brown, W. C.
Student geological society: Hayward, 2.
"Student model" approach: Tanner, 2.
Students, how to repel: Rogers, J. J. W.
Summer Institute: Campbell, C. D., 1; Dolloff.
Teacher preparation: Campbell, C. D., 1; Moss; Stephenson; Stoever; Tanner, 2; Yalkovsky.
Teacher aids.
Arrow labels for rocks: Rogers, A. S.
Atomic models of minerals: Sass, 2.
Crystal-structure models: Bayly.
Ground-water flow models: Blanchard; Lehr.
Ice-extrusion apparatus: Stone.
Magnetic board: Carozzi, 2.
Mount for fossil specimens: Hoare.
Stream-flow models: Tanner, 1.
Stream table: Brown, W. C.; Schwartz.
Trigonometric scales: Threet, 2.
Teaching crystallography: Webb, 2.
Teaching geology in French: Bellemin; Carozzi, 1.
Television: Johnson; Muehlberger, 2.
Terminology, geologic: Wickwire.
Thesis, suggestions on writing: Hunt, 2.
Thickness and age, integration of: Rahm, 3.
Topographic maps: Summerson, 1.
Training program of Geological Survey: Andrews.
Trigonometric scales: Threet, 2.
Videotape lectures: Muehlberger, 2.
Visiting geoscientist program: Matthews, 1.
Visualization ability, test of: Muehlberger, 1.
V's, rule of: Screven.
What every young geologist should know: Campbell, C. D., 2.
Writing a thesis, suggestions on: Hunt, 2.
X-ray fluorescence: Woodford.

NAGT Section Officers

New England
Pres.: Harold W. Borns, Jr.
University of Maine
Vice-Pres.: Ira E. Furlong
Bridgewater State College
Editor: Helen R. Stobbe
Smith College
Sec.-Treas.: Marshall Schalk
Smith College
(Dept. of Geol.
Northampton, Mass. 01060)

Eastern
Pres.: Jacob Freedman
Franklin and Marshall College
Vice-Pres.: Max Hawkins
Cortland State College
Editor: Leo M. Hall
Union College
Sec.-Treas.:Henry J. Bartosik
Port Washington Public Schools
(20 Circle Drive
Glen Cove, N. Y. 11542)

Central
Pres.: Paul C. Tychsen
Wisconsin State University–Superior
Vice.-Pres.: Dorothy Gore
Southern Illinois University
Editor: John A. Burger
Beloit College
Sec.-Treas.: Mrs. Katherine G. Nelson
University of Wisconsin–Milwaukee
(Geol. Dept.
Milwaukee, Wis. 53211)

Oklahoma
Pres.: Juel M. Trask
Tulsa Edison High School
Vice-Pres.: Helen J. Weakley
Skiatook Junior High School
Editor: Louise Jordan
Oklahoma Geological Survey
Sec.-Treas.: John W. Shelton
Oklahoma State University
(Dept. of Geol. and Geog.
Stillwater, Okla. 74075)

Southeastern
Pres.: James F. L. Connell
Alabama College
Vice-Pres.: Richard R. Priddy
Millsaps College
Editor: David D. Alt
University of Florida
Sec.-Treas.: Marvin L. Ivey
St. Petersburg Junior College
(Dept. of Natural Science
St. Petersburg, Fla. 33710)

East-Central
Pres.: Charles C. Rich
Bowling Green State University
Vice-Pres.: Warren Steel
Marietta College
Editor: Charles E. Graham
Denison University
Sec.-Treas.: Ansel M. Gooding
Earlham College
(Dept. of Geol.
Richmond, Ind. 47374)

Texas
Pres.: Dewitt C. Van Siclen
University of Houston
Vice-Pres.: C. L. McNulty, Jr.
Arlington State College
Editor: Wm. S. Strain
Texas Western College
Sec.-Treas.: James E. Brooks
Southern Methodist University
(Dept. of Geol.
Dallas, Tex. 75222)

Southwest
Pres.: Lawrence A. Warner
University of Colordado
Vice-Pres.: Jess R. Bushman
Brigham Young University
Editor: Richard M. Pearl
Colorado College
Sec.-Treas.: Paul T. Miller
Arizona State University
(Dept. of Geol.
Tempe, Ariz. 85281)

North-Central
Pres.: Samuel Treves
University of Nebraska
Vice-Pres.: William McMannis
Montana State College
Editor: John A. Brophy
North Dakota State University
Sec.-Treas.: Dane Picard
University of Nebraska
(Dept. of Geol.
Lincoln, Neb. 68504)

Far Western
Pres.: Wayne E. Kartchner
San Jose State College
Vice-Pres.: Joseph J. Graham
Stanford University
Editor: Thomas W. Todd
University of California at Davis
Sec.-Treas.: Raymond P. Puck
Hartnell College
(Dept. of Geol.
Salinas, Calif. 93901)

Pacific Northwest
Pres.: Robert W. Jones
University of Idaho
Vice-Pres.: J. Stewart Lowther
University of Puget Sound
Editor: Robert O. Van Atta
Portland State University
Sec.-Treas.: Ross C. Ellis
Western Washington State College
(Dept. of Geol.
Bellingham, Wash. 98225)

Journal of Geological Education
Index, Volume 8 (1960) through Volume 17 (1969)

Thomas E. Hendrix
Editor

SUBJECT INDEX

ADVANCED GEOLOGY
General
Geology and graduate education (Hambleton, William W.) 10 74
Master's program contribution (Gries, John Paul) 13 40
NSF, NDEA, NASA, the Ph.D. and geology (Coash, John R.) 13 81
Past and present Ph.D.'s (Hall, John F., *et al.*) 13 82
Suggestions on writing a thesis (Hunt, Charles B.) 12 130
Teaching
Course in statistical geology (Hubert, J. F.) 9 57
Courses in geology for advanced non-majors (Allen, J. E.) 13 145
Experimental petrology: indoor approach to outdoor subject (Wyllie, Peter J.) 14 93
Field geology for the advanced student (Proctor, Paul D.) 9 39
Reading course in marine geology (Schubel, J. R.) 14 63
Tests
Cultural tests to geology graduates (Boyer, Robert E.) 11 69

AREAL GEOLOGY
General
Geologist interprets aerial photographs (Olson, Annabel B.) 15 59
Inexpensive controlled mosaic for mapping (Mills, Joseph W.) 8 58
Map fronting (Schaff, Ross G.) 14 116
Simple rule of V's of outcrop patterns (Screven, Ruth Wehner) 11 98
New Hampshire
Monadnock Quadrangle (Hartshorn, Joseph H.) 15 191
New York-Vermont
Ticonderoga Quadrangle (Hartshorn, Joseph H.) 15 189
Pennsylvania
Renova West Quadrangle (Hartshorn, Joseph H.) 15 195
Rhode Island
Kingston Quadrangle (Hartshorn, Joseph H.) 15 193

ASTRONOMY
General
Lake storage of solar energy (CEGS) 15 221
View of the earth from space (Stevenson, Robert E.) 16 83
Teaching
Ceiling "planetarium" (Ardrey, Catherine) 17 188
Explorers from space (Fary, Raymond W., Jr.) 15 99
Geology and astrogeology (Rogers, John R.) 13 74
Models for laboratory (Johnston, Paul) 15 109
Moon with twenty questions (Dexter, William A.) 16 126
Planetarium programming (Degraff, Jerome V.) 17 54
Role of planetary geoscience (Short, Nicholas M.) 15 175

AUDIO-VISUAL TUTORIAL
General
Audio-visual aids in the geology classroom (Lovenburg, Mervin F.) 15 90
Audio-visual-tutorial approach to earth science instruction (Yarger, Richard D., *et al.*) 17 43
Auto-paced labs in physical geology (Siemankowski, Francis T., *et al.*) 17 38
Hybrid man-machine teaching method (Smith, F. G.) 14 123
Teaching by television: effective method or gimmick? (Johnson, Robert B.) 9 24
TV lectures in physical geology (Muehlberger, William R.) 10 101

CURRICULUM
Undergraduate
Academic trends and engineering geology (Kiersch, George A.) 12 14
Current revolution in the earth sciences (Wilson, J. Tuzo) 17 145
Do undergraduate departments have a future? (Moss, John H.) 13 3
Geological engineering curricula (Parker, John M. III) 9 13
Geology major in small college (Gates, Olcott) 9 83

Impact of high-school earth science (Hambleton, William W.) 12 69
Mathematics for geology students (GEO-Study Mathematics Panel) 13 91
Mineralogy curriculum (Gillerman, Eliot) 10 18
Mineralogy in the sixties (Slawson, C. B.) 11 91
New mineralogy (Gore, Dorothy J.) 9 29
Preparation for the student of geochemistry (Winchester, John W.) 10 13
Purposes of degree programs in geology (Merrill, William M.) 13 67
Role of planetary geoscience (Short, Nicholas M.) 15 175
Role of small college geology department (Hewitt, Philip C.) 13 99
Status of geological education in U.S. today (Monnett, V. Brown) 10 22
Stratigraphy as a collegiate study (Wells, John W.) 12 91
Undergraduate course in quantitative geology (Kauffman, Marvin E.) 10 72
Undergraduate instruction in geomathematics (Osborne, Robert H.) 17 120

EARTH SCIENCE

Foreign

en français (Bellemin, George J.) 12 117
Geological education in Ecuador (Flint, Norman K.) 15 135
Geological education in New South Wales [Australia] (Branagan, David F.) 14 131
Study of geology in France (Charlier, Roger H., *et al.*) 10 54

General

Bigness and smallness of time (Dexter, William A.) 15 161
Buying list of geology books for high school (Pangborn, Mark W., Jr.) 16 65
Classification in introductory earth science (Carl, James D.) 13 47
College-level geology course for high-school students (Hayes, John B.) 12 121
Current revolution in the earth sciences (Wilson, J. Tuzo) 17 145
Current status of earth science in secondary schools (Matthews, William H. III) 12 60
Death of an investigation (Samples, Robert E.) 14 69
Earth science in the junior museum (Roberts, John L.) 11 138
Earth science in urban community college (Dolgoff, Anatole) 16 141
Earth science puzzle (Jedlicka, John F.) 16 72
Earth science: then and now (Orgren, James R.) 17 179
Earth science versus general science in the ninth grade (Toohey, Jack V., *et al.*) 12 102
Effect of ESCP on introductory college geology course (Paull, R. A., *et al.*) 17 47
Elementary and secondary education at Chicago Natural History Museum (Roscoe, Ernest J.) 13 9
ESCP—to students of all levels of ability (Ladd, George T.) 16 61
Expected student outcomes in investigations (Thompson, John F.) 17 99
Experimental course for elementary teachers (Roscoe, Ernest J.) 14 194
Explorers from space (Fary, Raymond W., Jr.) 15 99
Extracurricular programs at Chicago Natural History Museum (Roscoe, Ernest J.) 13 55
Field courses in geology for high-school earth-science teachers (Stoever, Edward C., Jr.) 12 25
Field geology program for high school students (O'Brien, Neil R.) 14 51
Future spectrum (Croneis, Carey) 13 35
Geological history model Legaard, Kenneth J., *et al.*) 16 107
Geology in junior high school (Deprey, Milford J.) 10 45
Highlights of 1965 ESCP survey of earth science teachers (Shea, James H.) 14 9
High school geology for adults (Mann, John A.) 15 181
Impact of high-school earth science on college curriculum (Hambleton, William W.) 12 69
Implementing ESCP (Goedken, Ronald E.) 17 157
Investigating the earth—final revision (Thompson, John F.) 14 205
Junior high earth science (Fry, Harold C., Jr.) 16 174
Let's teach geology as science of the earth (Roy, Chalmer J.) 14 47
Moon with twenty questions (Dexter, William A.) 16 126
Multiple nested curricula and N-6 major (Connally, G. Gordon) 14 54
New England public secondary schools (Hume, James D.) 12 138
New science course for junior high school (Taylor, Peter) 11 135
Oceanographic training cruises for earth science teachers (Schubel, J. R., *et al.*) 17 95
Paperback books for earth science teachers (Proctor, Cleo V., Jr.) 15 29
Planning earth science teacher preparation (Merrill, William M., *et al.*) 14 23
Predicting effect of ESCP on introductory college geology courses (Paull, R. A., *et al.*) 17 47
Recommendations for preparation for earth science teachers (Shrum, John W.) 14 26
Recommendations: preparation of secondary school earth science teachers

(Merrill, William M., *et al.*) 14 29
Report on special earth science film project
(Martin, Irene) 16 56
Secondary school earth science course in science education
(Heller, Robert L.) 13 71
Seminar—workshop
(Craft, Jesse L.) 13 87
Senior high school earth science
(Cross, Whitman, II) 16 176
Strategy for alleviating shortage of earth science teachers
(Romey, William D.) 14 89
"Student model" approach to geology in the secondary schools
(Tanner, William F.) 12 49
Suggested program to meet the critical need for teachers
(Yalkovsky, Ralph) 8 6
Symposium on earth science
(Connally, G. Gordon) 16 166
Teacher problem in high-school earth-science
(Mass, John H.) 10 41
Teacher-training problems in earth science
(Stephenson, Robert C.) 12 74
Traditional approach
(Namowitz, Samuel N.) 16 170
Urban environment
(Horowitz, Irving L.) 16 172
Use of stereograms
(Mueller, Bruce E.) 14 33
Visiting geoscientist program for secondary schools
(Matthews, William H. III) 10 50
Why teach earth science?
(Ming, Roger W.) 16 167
United States
Advanced physical geology course for high-school science teachers
(Campbell, C. D.) 8 1
Connecticut Secondary schools
(Kendall, David L.) 16 178
ESCP
(Heller, Robert L.) 12 64
New Jersey
(Pollock, Archie W.) 16 180
Ohio
(Roth, Robert A.) 17 185
Preparation of earth science teachers in Ohio
(Skinner, Ray, Jr., *et al.*) 13 85
Revision of Pennsylvania earth and space course
(Moss, John H., *et al.*) 16 184

ELEMENTARY GEOLOGY
Introductory Course
Adaptation of ordinary microscopes for petrographic use
(McGehee, Richard V.) 14 116
Aid to geologic map interpretation
(Gooding, Ansel M., *et al.*) 13 117
Angle of repose box
(Jopling, Alan V.) 13 143
Atomic models of minerals
(Sass, Daniel B.) 11 133
Auto-paced labs in physical geology
(Siemankowski, Francis T., *et al.*) 17 38
Cause and effect. a fable for geology teachers
(Platt, Lucian B.) 10 28
Classification in introductory earth science
(Carl, James D.) 13 47
Classroom stream table
(Brown, Walter C.) 8 63
College-level geology course for high-school students
(Hayes, John B.) 12 121
Compleat examination
(Baird, D. M.) 14 119
Computer-oriented lab exercises
(Fox, William T.) 17 125
Earth science in urban community college
(Dolgoff, Anatole) 16 141
Effect of ESCP on introductory geology course
(Paull, R. A., *et al.*) 17 47
Effects of environment on learning process
(Todd, Thomas W., *et al.*) 15 145
Electric analog model for ground-water flow
(Blanchard, Frank N.) 12 104
Evolution as concept
(Laporte, Léo F.) 13 115
Experiment in natural selection
(Grender, Gordon C.) 17 58
Experimental approaches
(Hendrix, T. E., *et al.*) 13 137
Facts versus concepts
(Norris, Robert M.) 11 140
Field exercises
(Sass, Daniel B.) 10 79
Geological history model
(Legaard, Kenneth J., *et al.*) 16 107
Geology as interdisciplinary experimental science
(Hayward, O. T.) 14 66
Geology from national parks and monuments
(Allen, J. E.) 13 53
Geology in liberal arts studies
(Albritton, Claude, *et al.*) 13 147
Geologic terminology and the elementary student
(Heald, Milton T., *et al.*) 11 56
Ground-water flow models
(Lehr, Jay H.) 11 124
Ground-water reports
(Baldwin, Brewster) 8 9
Hypothetical regions in historical geology
(Haglund, Wayne, *et al.*) 17 55
Inexpensive models for helical flow in streams
(Tanner, William F.) 10 116
Integrated approach to historical geological labs
(Miller, Barry B., *et al.*) 16 43
Integrated final exam for laboratories
(Rahm, David A.) 8 49
Integration of relative age, absolute age, and stratigraphic thickness
(Rahm, David A.) 10 110
Interdisciplinary honors program in geology and biology
(Weis, Leonard W., *et al.*) 17 175
Let's abandon physical and historical geology [courses]
(Fisher, Irving S.) 13 12
Let's teach geology as science of the earth
(Roy, Chalmer J.) 14 47
Low-cost flume
(Harrison, Samuel S.) 15 105
Magnetic board for historical geology
(Carozzi, Albert V.) 12 28

Minerals for physical geology laboratory
(Higgins, C. G.) 8 41
Need for flexibility
(Romey, William D.) 17 193
New maps for topographic-map interpretation
(Summerson, Charles H.) 8 54
Phase change experiments
(Elders, Wilfred A.) 15 185
Porosity and permeability experiments
(Brice, James C., *et al.*) 10 81
Relief model for contours
(Christman, Robert A.) 13 113
Rock cycle
(Baldwin, Brewster) 10 9
"Scrambled Book" in freshman geology
(Tanner, William F.) 15 69
Student participation in large class
(Keller, W. D.) 14 61
Tank for alluvial processes
(Larsen, Frederick D.) 16 53
Teaching a blind person
(Richard, Benjamin H., *et al.*) 15 152
Teaching by television: effective method or gimmick?
(Johnson, Robert B.) 9 24
Television lectures in physical geology
(Muehlberger, William R.) 10 101
Time-lapse photography
(Fahnestock, Robert K.) 14 127
Two Creeks Project
(Black, Robert F., *et al.*) 16 139
What is a good examination?
(Scotford, David M.) 12 22

FIELD GEOLOGY

General

Geologist interprets aerial photographs
(Olson, Annabel B.) 15 59
Inexpensive controlled mosaic for mapping
(Mills, Joseph W.) 8 58
Map fronting
(Schaff, Ross G.) 14 116

Teaching

Aid to teaching principles of geologic map interpretation
(Roberts, John L.) 13 153
Analysis of some aspects of geology summer field courses
(Paull, R. A.) 17 17
Bus displays for field trips
(Lokke, Donald H.) 13 60
Chalkboard illustrations on field trips
(Lokke, Donald H.) 13 60
Comparison of four summer field stations
(Fuller, J. Osborn) 11 41
Field courses in geology for high-school earth-science teachers
(Stoever, Edward C., Jr.) 12 25
Field exercises for introductory geology
(Sass, Daniel B.) 10 79
Field geology for the advanced student
(Proctor, Paul D.) 9 39
Field work: scientific birthright
(Keller, W. D.) 11 119
Laws of field geology
(Allen, J. E.) 14 219
Local geology in 3-D models
Lokke, Donald H., *et al.*) 13 23
Merits of multiple sites for field camps
(Staples, Lloyd W.) 15 113
NAGT looks at summer field courses
(Hendrix, T. E.) 15 73
NAGT-USGS Cooperative Project
(Moss, John H.) 16 99
Program for high school students
(O'Brien, Neil R.) 14 51
Student training for summer field course
(Mears, Brainerd, Jr.) 8 44
Wasatch-Uinta summer field course
(Hoppin, Richard A.) 16 135

FOREIGN GEOLOGY

Courses

Exchange, Kansas and Leicester Universities
(Whitaker, John H. McD., *et al.*) 16 91

Curricula

China prior to 1948
(Huang, Walter T.) 8 14
Geological education in Ecuador
(Flint, Norman K.) 15 135
Geological education in New South Wales [Australia]
(Branagan, David F.) 14 131
Study of geology in France
(Charlier, Roger H., *et al.*) 10 54

General

Citing Russian articles
(Petriwsky, Eugene E., *et al.*) 15 118
Geologists versus the foreign literature
(Vitaliano, Dorothy B.) 9 74
Some reflections on geological education in the Soviet Union
(Romey, William D.) 16 3

GEOCHEMISTRY

General

Advantage of pE over Eh in redox equilibrium calculations
(Truesdell, A. H.) 16 17
Eh-pH diagrams
(Cloke, Paul L.) 14 140
Fractional crystallization and igneous differentiation
(CEGS) 15 229
Geochemical weathering: raw materials
(Keller, W. D.) 14 17
Introduction to crystal chemistry
(CEGS) 15 223
Isotopic geochemistry of water
(CEGS) 15 239
Mineral assemblages as evidence for conditions of metamorphism
(CEGS) 15 233
Origin of Magma
(CEGS) 15 227
Oxidation and supergene enrichment deposits
(CEGS) 15 265
Salt and things
(CEGS) 15 249
Simple and effective way to teach spectroscopy
(Schulz, Werner) 16 50
Terrestrial heat flow, radioactivity, and chemical composition of earth's interior
(Winchester, John W.) 14 200

Weathering rates at Cleopatra's Needls (Winkler, Erhard M.) 13 50
Weathering rates of Portland Arkose tombstones (Matthias, George F.) 15 140
Teaching
Preparation for the student of geochemistry (Winchester, John W.) 10 13

GEOLOGY
General
AAPG Science Fair awards (Bishop, Margaret S.) 15 15
Cause and effect, a fable for geology teachers (Platt, Lucian B.) 10 28
Current revolution in earth sciences (Wilson, J. Tuzo) 17 145
Do undergraduate departments have a future? (Moss, John H.) 13 3
Earth a slave to energy (Keller, W. D.) 10 1
Earth scientist and his future responsibilities in adult education (Stevenson, Louise S.) 13 134
EDPM information retrieval (Weber, Jon N.) 10 69
Education and geologic problems (Hagner, Arthur F.) 9 89
Education for geological surveys (Hambleton, William W.) 14 83
Enlarger as copy camera (Hughes, R. J., Jr.) 9 27
Felsenmeers anyone? (Chapman, John J.) 17 198
Four levels in good teaching (Nichols, Robert L.) 14 92
Future of the past (Patton, John B.) 16 123
Geochemical weathering: raw materials for good living (Keller, W. D.) 14 17
Geological education for lay public (Copley, Albert J.) 13 55
Geological perspective (Croneis, Carey) 9 1
Geology and astrogeology (Rogers, John R.) 13 74
Geology as interdisciplinary experimental science (Hayward, O. T.) 14 66
Geology and liberal education (Holmes, Chauncey D.) 17 142
Geology—for human needs (Halbouty, Michel T.) 15 80
Geology—the third culture (Dodge, Charles F.) 17 196
How to repel students from the profession (Rogers, John J. W.) 12 85
In defense of geological libraries (Paull, Richard A.) 14 57
Impact of digital computer (Weber, Jon N.) 12 41
Influence of education on founders of AAPG (Bishop, Margaret S.) 14 197
Information storage and retrieval (Fenner, Peter) 12 94
Is uniformitarianism useful? (Gould, Stephen J.) 15 149
Keeping abreast of the wave (Muehlberger, William R.) 14 138
Let's teach geology as science of the earth (Roy, Chalmer J.) 14 47
Library challenge in earth science (Wheeler, Marjorie W., *et al.*) 15 151
Metageology: science plus aesthetics (Pestrong, Raymond) 16 137
Object of the game (Bates, Robert L.) 17 3
The other road (Flawn, Peter T.) 15 5
Peace Corps geologists to Africa (Strain, W. S.) 10 58
Philosophy of geological education (Ellison, Samuel P., Jr.) 14 3
The present is the key to the present (Valentine, James W.) 14 59
Quantify what? (Woodford, A. O.) 11 1
Research as a teaching aid (Heim, George E., Jr.) 13 15
Responsibility in public affairs (Halbouty, Michel T.) 15 205
Role of small college geology department (Hewitt, Philip C.) 13 99
Sea level since Cretaceous (Eardley, A. J.) 12 1
Serial literature used by American geologists (Woodford, A. O.) 17 87
Slide copying facilitated (Hughes, R. J., Jr.) 15 117
Smithsonian "Scientific DEW Line" (Cornell, James C., Jr. 17 155
Some thoughts on professionalism (Rogers, John J. W.) 16 132
Status of geological education in U.S. today (Monnett, V. Brown) 10 22
Student geological society in geological education (Hayward, O. T.) 10 119
Suggestions on writing a thesis (Hunt, Charles B.) 12 130
On teaching and learning (Keller, W. D.) 16 13
Uniformitarianism reconsidered (Hay, Edward A.) 15 11
University's role in industrial geological education (Walper, Jack L.) 12 54
What every young geologist should know (Campbell, Charles D.) 10 37
What I have learned (Allen, J. E.) 16 7
What is a good examination? (Scotford, David M.) 12 22
What the big idea? (Stokes, William Lee) 15 13
Why study geology? (Hewitt, Philip C.) 15 8
Geological Time
Bigness and smallness of time (Dexter, William A.) 15 161
Integration of relative age, absolute age, and stratigraphic thickness (Rahm, David A.) 10 110

Measurement of geologic age of rocks (CEGS) 15 247
Relative ages of rocks (CEGS) 15 243

GEOMORPHOLOGY
General
Alluvial fans (Bull, William B.) 16 101
Development and evolution of hillslopes (Schumm, S. A.) 14 98
Inexpensive ice-extrusion apparatus (Stone, John E.) 12 135
Inexpensive models for helical flow in streams (Tanner, William F.) 10 116
Low-cost flume (Harrison, Samuel S.) 15 105
Model to demonstrate limestone cavern formation (Pomeroy, Harry F., Jr.) 14 207
Pediments (Hadley, Richard F.) 15 83
Rates of denudation (Ritter, Dale F.) 15 154
Stream grade (CEGS) 15 237
Stream-table of glacial landforms (Schwartz, Maurice) 11 29
Tank for alluvial processes (Larsen, Frederick D.) 16 53

GEOPHYSICS
General
Current revolution in earth sciences (Wilson, J. Tuzo) 17 145
Earthquake regions (Jedlicka, John F.) 16 108
Earthquake waves and the earth's interior (CEGS) 15 251
Energy and earthquake magnitude (CEGS) 15 257
Heat flow in the earth (Simmons, Gene) 14 105
High pressure geophysics—equipment and results (Simmons, Gene) 16 21
International Institute of Seismology and Earthquake Engineering (Kisslinger, Carl) 15 3
Sea-floor spreading—new evidence (Vine, F. J.) 17 7
Terrestrial heat flow, radioactivity, and chemical composition of earth's interior (Winchester, John W.) 14 200
Three-D model of earth's magnetic field (Northcutt, Fred) 16 47

HISTORY
Geology
Amos Eaton: pioneer teacher of science (Rezneck, Samuel) 13 131
Dr. Stuckey does write about geologists (White, George W.) 14 136
Ecology of geologists: need for a course (Youngquist, Walter) 14 6
Excerpt from closing scenes and escape (Pumpelly, Raphael) 16 164
Excerpt from life at the Santa Rita Pumpelly, Raphael 16 60
Excerpt from thrills in fossil hunting (Sternberg, George F.) 15 78
Frederick Mohs and the scale of hardness (Staples, Lloyd W.) 12 98
Geographic environment and geological leadership, Cincinnati Arch Area (Croneis, Carey) 11 81
Pre-Civil War specialization (Aalto, Kenneth R.) 17 91
Sorby, founder of petrography (Folk, Robert L.) 13 43

HYDROGEOLOGY
General
Electric analog model (Blanchard, Frank N.) 12 104
Ground-water flow models (Lehr, Jay H.) 11 124
Porosity and permeability experiments (Brice, James C., *et al.*) 10 81
Water-table surface in environmental geology (Mozola, Andrew J.) 14 187

MEMORIALS
Brown, Olin Teter (Connell, James F. L.) 11 28
Gault, Hugh Richard (Whitcomb, Lawrence) 10 21
Grawe, Oliver Rudolph (Morgan, R. E.) 13 124
Grimm, Kenneth Edgar (Cook, Earl F.) 10 90
Merrick, F. Kermit (Bond, Robert D.) 12 68
Pabst, Marie B. (Christman, Robert A.) 11 94
Putnam, William C. (Ford, Waldo E.) 11 94
Stockdale, Paris Buell (Klepser, Harry J.) 10 129
VanderHoof, Vertress Lawrence (Webb, Robert W.) 12 125

MINERALOGY
Crystallography
Atomic models of minerals for introductory geology (Sass, Daniel B.) 11 133
Concepts of crystal chemistry in introductory mineralogy lab (Roberson, Herman E., *et al.*) 14 12
Crystals and Liesegang structure in silica gel (Sassen, Roger) 15 198
Dry synthesis of K(Cl,Br) solid solutions (Bodine, Marc W., Jr., *et al.*) 14 15
Microwave diffraction—a teaching analogue (Connelly, John J., *et al.*) 16 95
New graphical presentation of optical properties (Oppenheim, M. J.) 17 153
Teaching elementary geometrical crystallography (Webb, Robert W.) 11 26
Tetrahedral models (Arem, Joel E.) 15 66
Triangular scheme for crystal morphology (Warner, Lawrence A.) 14 183
General
Mineral genesis in curriculum

(Gillerman, Elliot) 10 18
Mineralogy in the sixties
(Slawson, C. B.) 11 91
New mineralogy
(Gore, Dorothy J.) 9 29
Identification
Flow sheets for identification
(Bayly, M. B.) 14 195
Fusion method for rare metals
(Crawford, T. C., *et al.*) 8 11
Rapid method for numbering hand specimens
(Brice, James C.) 14 34
Self-testing boards for rocks, minerals, fossils
(Brent, Millard D., *et al.*) 13 23

MINERAL RESOURCES
Teaching
Geochemical weathering: raw materials
(Keller, W. D.) 14 17
Mineral resources for student
(Agron, Sam L.) 9 32
Role of geologist in life cycle of a mine
(Peters, William C.) 14 191

NAGT
General
Eastern Section, NAGT, 1950-1962
(Rosalsky, Maurice B.) 10 122
Membership statistics, NAGT
(Rosalsky, Maurice B.) 9 47

NEIL MINER AWARD
Keller, Walter D.
(Unklesbay, A. G.) 15 215
Lowe, Kurt E.
(Friedman, Gerald M.) 16 195

OCEANOGRAPHY
Experiments
Wave-motion, flow-separation, helicoidal flow and stationary vortices
(Allen, J. R. L.) 13 78
General
Sea level since Cretaceous
(Eardley, A. J.) 12 1
Teaching
Computer-oriented lab exercises
(Fox, William T.) 17 125
Oceanographic training cruises for earth science teachers
(Schubel, J. R., *et al.*) 17 95
Oceanography at inland university
(Chave, Keith E.) 11 10
Option for geology major
(Arnal, Robert E.) 12 12
Reading course in marine geology
(Schubel, J. R.) 14 63

PALEONTOLOGY
General
Adaptation among paleontologists
(Buehler, Edward J.) 13 16
Bahama Banks: "living" fossil-environment
(Kornicker, Louis S.) 11 17
Frontiers in economic micropaleontology
(Haas, M. W.) 17 81
New perspectives
(Beerbower, James R.) 11 95
Paleoecology
(Laporte, Léo F.) 17 75
Plastic mount for small specimens
(Hoare, Richard D.) 12 132
Teaching
Evolution as concept for introductory course
(Laporte, Léo F.) 13 115
Illustrated key
(Nagle, J. Steward) 15 160
Marine aquaria
(Marszalek, Donald S., et al.) 16 159
Realism in fossil study
(Edge, Lyle N., *et al.*) 16 71
Self-testing boards for rocks, minerals, fossils
(Brent, Millard D., *et al.*) 13 23

PHYSICAL GEOGRAPHY
General
Angle of repose box
(Jopling, Alan V.) 13 143
Contour patterns with random data
(Dodd, J. Robert, *et al.*) 13 109
Further random thoughts on random numbers
(Cain, J. Allan) 14 62
Problems of longitude and international date line
(Berr, Stephen F.) 13 117
Short method for computing location
(Tomikel, John) 16 58
Simple 3-D model for topography
(Ehlmann, Arthur J., *et al.*) 13 153
Slope-correction chart
(Felsher, Murray) 15 116

PETROLOGY
Experiments
Binary eutectic system
(Barker, Daniel S.) 17 104
Low temperature control unit
(Howe, David A., *et al.*) 17 35
Phase change
(Elders, Wilfred A.) 15 185
General
Adaptation of ordinary microscopes for petrographic use
(McGehee, Richard V.) 14 116
Experimental petrology: indoor approach to an outdoor subject
(Wyllie, Peter J.) 14 93
Field classification of aphanitic igneous rocks
(Robertson, Forbes) 9 35
Fractional crystallization and igneous differentiation
(CEGS) 15 229
Mineral assemblages as evidence for conditions of metamorphism
(CEGS) 15 233
Origin of magma
(CEGS) 15 227
Set theory and rock classifications
(McCutchen, William T.) 14 91
Sorby, founder of petrography
(Folk, Robert L.) 13 43
Teaching
Custom rock trimmer
(Hinman, Eugene E.) 13 17
Igneous rock chart
(Hagni, Richard D.) 13 105

Petrographic parallelepiped
(Grew, Edward S.) 12 57
Phase change experiments
(Elders, Wilfred A.) 15 185
Self-testing boards for rocks, minerals, fossils
(Brent, Millard D., *et al.*) 13 23

SEDIMENTATION
General
Low-cost flume
(Harrison, Samuel S.) 15 105
Recent carbonate sediments
(Chave, Keith E.) 15 200

STRATIGRAPHY
General
Standard stratigraphic computer code
(Kottlowski, Frank E.) 16 143
Teaching
Clay models
(MacQuown, W. C., Jr., *et al.*) 16 69
Constructing multiple working cross sections
(Menzer, Fred J., Jr., *et al.*) 16 9
Indoor stratigraphy exercise
(Tomikel, John) 15 18
Integration of relative age, absolute age, and stratigraphic thickness
(Rahm, David A.) 10 110
Simplified slide rule for section measurement
(Threet, Richard L.) 9 70
Stratigraphy as a collegiate study
(Wells, John W.) 12 91

STRUCTURAL GEOLOGY
General
Current revolution in the earth sciences
(Wilson, J. Tuzo) 17 145
Sea-floor spreading—new evidence
(Vine, F. J.) 17 7
Shock processes in geology
(Short, Nicholas M.) 14 149
Tectonic model table
(Wells, Herbert C.) 15 197
Teaching
Alpine structural geology in French
(Carozzi, Albert V.) 9 79
Clay models
(MacQuown, W. C., Jr., *et al.*) 16 69
Computer applications to 3-point problems
(Chang, Yi-Maw) 16 15
Gravity nomographs for faults
(Crosby, Gary W.) 13 102
Large diameter stereonet
(Dunn, David E.) 15 17
Modification of stereonet
(Crawford, William A.) 15 161
Plea for changes in undergraduate courses
(Burger, H. Robert) 17 101
Procedure for rapid plotting of point diagrams
(Pincus, Howard J.) 13 7
Sand models
(Schalk, Marshall) 15 18
Space relations test
(Muehlberger, William R., *et al.*) 9 62
Transform fault model
(McLoda, William S.) 17 151
Trigonometric scales to simplify descriptive geometry
(Threet, Richard L.) 12 126
Two-dimensional strain and application with use of card-deck models
(Ragan, Donal M.) 17 135
Use of stereograms in high school earth science
(Mueller, Bruce E.) 14 33

SUMMER FIELD STATIONS
Evaluation
Analysis of some aspects of geology summer field courses
(Paull, R. A.) 17 17
Comparison of four stations
(Fuller, J. Osborn) 11 41
NAGT looks at summer field courses
(Hendrix, T. E.) 15 73
Wasatch-Uinta summer field course
(Hoppin, Richard A.) 16 135
General
Merits of multiple sites for field camps
(Staples, Lloyd W.) 15 113
NAGT-USGS Cooperative Project
(Moss, John H.) 16 99
Student training for summer field course
(Mears, Brainerd, Jr.) 8 44

SUMMER INSTITUTES
Earth Science
North Carolina State University
(Anderson, Norman D.) 17 191
Secondary-school students
(Dolloff, Norman H.) 9 19

U.S. GEOLOGICAL SURVEY
Training Program
Aids to teachers and students
(Thurston, William) 14 135
Geologists from less developed countries
(Andrews, David A., *et al.*) 11 113
Popular publications
(Visual Services Staff, USGS)

AUTHOR INDEX

Aalto, Kenneth R.
Specialization and professionalization of pre-Civil War North American geology, 17:3:91-94, 1 table, 1 figure, refs. cited.

Agron, Sam L.
Mineral resources for the general college student, 9:1:32-33, refs. cited.

Albritton, Claude
(and Eckelman, Donald, Kitts, David B., Shaw, Denis, and Stearns, Richard G.). Introductory geology in the framework of liberal art studies, 13:5:147-149.

Allen, J. R. L.
Simple experiments to demonstrate wave-motion, flow-separation, heliocoidal flow and stationary vortices, 13:3:78-80, 2 figures, refs. cited.

Allen, John Eliot
1. (and Crawford, T. C.). A fusion method for quick determination of certain rare metals, 8:1:11-13, 1 table.
2. Geology taught from national parks and monuments, 13:2:53-54, 2 tables.
3. Courses in geology for advanced non-majors, 13:5:145-147.
4. Some laws of field geology, 14:5:219.
5. What I have learned, 16:1:7-8.

Anderson, Norman D.
Summer institutes in earth science at North Carolina State University, 17:5:191-193, refs.

Andrews, David A.
(and Schoechle, George L., and Brown, Gertrude W.). The Geological Survey's training program for geologists from less developed countries, 11:4:113-118, 1 figure.

Ardrey, Catherine
Ceiling "planetarium," 17:5:188-190, 2 figures.

Arem, Joel E.
Constructional of tetrahedral models to aid visualization of multicomponent systems, 15:2:66-68, 3 figures, refs. cited.

Arnal, Robert E.
An oceanography option for the geology major, 12:1:12-13, 1 table.

Baird, D. M.
The compleat examination in general geology, 14:3:119.

Baldwin, Brewster
1. Ground-water reports for outside reading in the beginning geology course, 8:1:9-10.
2. The rock cycle, 10:1:9-12, 2 tables, refs. cited.

Barker, Daniel S.
A low-melting binary eutectic system for student experimentation, 17:3:104, ref. cited.

Barnard, Walter M.
(and Connelly, John H.). Microwave diffraction—a teaching analogue for X-ray diffraction, 16:3:95-98, 2 figures, refs. cited.

Bates, Robert L.
The object of the game, 17:1:3-5, refs.

Bayly, M. B.
Flow sheets for mineral identification, 14:4:195-196, 1 fig.

A new science course for junior high school, 11:4:135-137.

Thomas, Franklin D.
and MacQuown, W. C., Jr.). Clay models stimulate geologic structural and stratigraphic features, 16:2:69-71, 2 figures.

Thompson, John F.
1. Investigating the earth—final revision, 14:5:205-206.
2. Expected student outcomes in earth science investigations, 17:3:99-101, 2 figures.

Threet, Richard L.
1. A simplified slide rule for stratigraphic section measurement, 9:2:70-73, 1 figure, refs. cited.
2. Trigonometric scales to simplify descriptive geometry in structural geology, 12:4:126-129, 1 figure, refs. cited.

Thurston, William
U.S. Geological Survey's aids to teachers and students, 14:4:135-136.

Todd, Thomas W.
(and Sommer, Robert). Effects of environment on the learning process: geology S-119, a case study, 15:4:145-148, refs. cited.

Tomikel, John
1. An indoor stratigraphy exercise, 15:1:18.
2. A short method for computing location, 16:2:58-59, 1 figure.

Toohey, Jack V.
(and Fullerton, Bill J.). Earth science versus general science in the ninth grade, 12:3:102-103.

Truesdell, A. H.
The advantage of using pE rather than Eh in redox equilibrium calculations, 16:1:17-20, 2 figures, refs. cited.

Unklesbay, A. G.
Neil Miner award citation to Walter D. Keller, 15:5:215.

Valentine, James W.
The present is the key to the present, 14:2:59-60, refs. cited.

VandenAvond, Richard
(and Paull, R. A. and Larson, A. C.). Predicting the effect of ESCP on introductory college geology courses, 17:2:47-53, 1 table, 9 figures, ref. cited.

Vine, F. J.
Sea-floor spreading—new evidence, 17:1:7-16, 10 figures, refs.

Visual Services Staff, U.S. Geological Survey
The U.S. Geological Survey's popular publications, 14:3:87-88.

Vitaliano, Dorothy B.
Geologists versus the foreign literature, 9:2:74-78, refs. cited.

Walper, Jack L.
1. The university's role in industrial geological education, 12:2:54-56.
2. (and Ehlmann, Arthur J.). A simple 3-D model for topographic representations, 13:5:153-154, 1 figure.

Ward, Dederick C.
(and Petriwsky, Eugene E.). Citing Russian articles, 15:3:118-119, 1 figure.

Warner, Lawrence A.
A triangular scheme for crystal morphology, 14:5:183-186, 5 figures, refs. cited.

Webb, Robert W.
1. Teaching of elementary geometrical crystallography, 11:1:26-28, 1 table.
2. Memorial, Vertress Lawrence VanderHoof, 1904-1964, 12:4:125.

Weber, Jon N.
1. EDPM information retrieval in the geological sciences, 10:3:69-71, 1 fig., refs. cited.
2. Impact of the digital computer on the geological sciences, 12:2:41-48, 1 fig., refs. cited.

Weis, Leonard W.
(and Schwartz, Leander J.). Interdisciplinary honors program in introductory geology and biology, 17:5:175-178, 5 tables, refs. cited.

Wells, Herbert C.
Tectonic model table suitable for research or instruction, 15:5:197-198, 1 figure, ref. cited.

Wells, John W.
Stratigraphy as a collegiate study, 12:3:91-93.

Wheeler, Marjorie W.
(and Wheeler, Robert R.). Library challenge in earth science, 15:4:151-152, refs. cited.

Wheeler, Robert R.
(and Wheeler, Marjorie W.). Library challenge in earth science, 15:4:151-152, refs. cited.

Whitaker, John H. McD.
(and Ford, Trevor D., and Le Bas, Michael J.). Venturing abroad: Kansas and Leicester universities exchange visits, 16:3:91-95, 1 figure, refs. cited.

Whitcomb, Lawrence
Memorial, Hugh Richard Gault, 1915-1961, 10:1:21.

White, George W.
Dr. Stuckey does write about geologists, 14:4:136-137.

Wickwire, Grant T.
(and Heald, Milton T. and Holmes, Chauncey D.). Geologic terminology and the elementary student, 11:2:58-68.

Wilson, C. H.
(and Haglund, Wayne). Study of hypothetical regions in historical geology laboratory, 17:2:55-57, 3 figures, refs. cited.

Wilson, J. Tuzo
Some aspects of the current revolution in the earth sciences, 17:4:145-150, 1 table, refs.

Winchester, John W.
1. Undergraduate preparation for the student of geochemistry, 10:1:13-17.
2. Terrestrial heat flow, radioactivity, and the chemical composition of the earth's interior, 14:5:200-204, 5 tables, refs.

Winkler, Erhard M.
Weathering rates as exemplified by Cleopatra's Needle in New York City, 13:2:50-52, 1 figure, refs. cited.

Woodford, A. O.
1. Quantify what?, 11:1:1-9, refs. cited.
2. Serial literature used by American geologists, 1967, 17:3:87-90, 2 tables, refs. cited.

Wyllie, Peter J.
Experimental petrology: an indoor approach to an outdoor subject, 14:3:93-97, 3 figures.

Yalkovsky, Ralph
A suggested program to meet the critical need for teachers, 8:1:6-8.

Yarger, Richard D.
(and Cranson, K. R.). Application of the audio-visual-tutorial approach to earth science instruction, 17:2:43-46, 1 table, 2 figures.

Youngquist, Walter
Ecology of geologists: Need for a course on the geological profession, 14:1:6-8.
